

Spectrum will convert to an all-digital cable format in the Town of Aurora and Village of East Aurora on April 17. Spectrum customers with Internet service and at least one cable box can use a Spectrum app-enabled device such as a Roku, Xbox One or Samsung Smart TV. Once the Spectrum app is installed on any of these devices, customers will be able to access TV channels, as well as On Demand content, similar to a TV with a Spectrum cable box. **If customers do not have a cable box or one of the devices listed above, they will be unable to access any channels on that TV.**

For information, call Spectrum at 1-800-892-4357
